## Workflow

Query classification: Reccomendation/Business problem/General query

**Approach:** Semantic search

**LLM1: Reccomendation** 

Approach: Chain of thoughts

## **Prompt:**

- Default prompt: Always use Ford technology stack
- 2. USER Prompts: Recommend me technology for data warehousing.
- 3. Preprocessing lower, replace, split,
  - a. Find common technology
  - b. If no common technology: Output same
  - If few common technology:
    Again query + Use only these common technology.
  - d. Find Link for common technology form data frame.

LLM2: Business problem

**Approach**: Sequential list of questions

**Prompt**: Ask the user following questions in sequence, formatting their response as a list:

- 1. Scope: How to define the objective of problem?
- 2. Costs: Budget and ROI?
- 3. Time: How much it may take?
